NOTES:
These bindings are designed primarily for use with the left stick & mouse. But you can use the right stick for the functions shown. For the best experience, I suggest binding the following functions to your mouse and remove all other functions from these buttons:
Button 4 - Interaction Mode | Button 5 - Target Under Reticle | Middle Mouse - VOIP PTT

* This function may not be fully implemented or working in the current patch.
** GENERAL FUNCTIONS refer to Functions that work in multiple Roles / Modes
* Engaging Freelook will disable your steering in a vehicle.
